GHX Solutions for the
U.S. Government

Driving a more resilient supply chain with digitization, analytics and insight

GHX

Founded in 2000, GHX pioneered healthcare's largest cloud-based supply chain network, which today connects tens of thousands of healthcare organizations across the globe. Over the last two decades, GHX has continued innovating alongside a passionate community of healthcare providers, suppliers, distributors and other industry stakeholders providing our federal government customers a single source of standards-based, proven supply chain modernization.

A Digital Supply Chain

GHX solutions help health systems power the patient-centered business of healthcare

Why GHX?

» Healthcare-focused provider of SaaS/cloud-based supply chain automation solutions

» Enables healthcare providers, manufacturers and distributors to transact and collaborate within a single platform

» The largest healthcare digital trading network covering North America and Europe

» Credentials vendor representatives and entities to help meet the growing accreditation and regulatory compliance requirements in healthcare

Reduce Friction With an End-to-End Digitized Experience

Innovative solutions for the U.S. Government

Supply Chain Modernization | GHX Exchange Enterprise
Digitize the procure-to-pay process and automate a 3-way price match for correct contract pricing; match invoice to PO with high-quality, more complete data fed by fully automated transactions.

Enterprise Catalog Management | GHX Data Connect
Data is critical to the health of your supply chain, and our solutions help provide the most accurate, up-to-date, standardized data in your materials management information system (MMIS). Clean data flowing through your systems helps improve the efficiency and effectiveness of your healthcare supply chain.

Vendor Management | GHX Vendormate
Make vendor credentialing easier and more attainable for vendor representatives in your health system.

Working Capital Optimization | GHX ePay
Reduce administrative burden, help eliminate errors and maximize early pay discounts — improving cashflow and efficiency.

eCommerce and Requisitioning | GHX Marketplace
Drive contract utilization at the point of requisition with this virtual ecommerce solution. A single purchasing gateway for all clinical and non-clinical supplies and services that help drive item and price compliance across the procure-to-pay lifecycle.

Inventory Management | GHX Syft
Help ensure essential medical supplies are available for patients with software that helps you efficiently track, organize, and manage your inventory of products or supplies. From package receipt to par location delivery, our warehouse and distribution solutions play a crucial role in supply chain automation. Our decedent management software supports the tracking of deceased patients.

Clinical Integration | GHX Lumere
Make evidence-based decisions about product selection, drive compliance using physician-level utilization data, and evaluate clinical and functional equivalents to drive high-quality, cost-effective care.
