

GHX Inventory Management

Physical Inventory Services Overview

Accurate Point-In-Time Inventory

GHX provides supply chain leaders with accurate point-in-time inventory for year-end, mid-year and baseline reporting, as well as perpetual and periodic inventory services. The information below outlines what is included with each inventory service level.

Perpetual Services

Physical Inventory Only

- Trained and qualified inventory team records current inventory counts in each department using customer count sheets or electronic files
- Expired items identified and removed from shelving and placed in location(s) designated by client
- Results returned to the client to update quantity on-hand details, run variance reports and review the results prior to project completion
- Reconcile write-ins, address unmatched items, conversion factor issues and price adjustments are left to the client in order to create a final valuation report

Periodic Services

Physical Inventory and Valuation

- Trained and qualified inventory team records current inventory counts in each department
- Expired items identified and removed from shelving and placed in location(s) designated by client
- Access to valuation reports and analytics through the customer portal
- Expired items reported in separate valuation report within the portal
- Count and flag consigned products and create separate valuation report within the portal
- Use client's Item Master and PO history to value inventory (supplemented by our reference database for unmatched items)
